Packaging & Delivery

Package Size	100.00cm * 20.00cm * 60.00cm
Package Gross Weight	20.000kg

Product Description

The function of vehicle leaf springs:

The leaf spring is composed of many steel plates with elasticity, uniform width and different lengths. Its function is to connect the frame and the axle together in the form of suspension, expose between the frame and the axle, bear the load impact of the wheel on the frame, reduce the violent vibration of the body, maintain the stability of the vehicle and adaptability to different road conditions.
